Hi Bob:

Here is another B160 scoping comment, that was apparently submitted thru Jeff Cohen. Please include with the other comments received.

Thanks, Paul

>Comments: I cannot get to any of the current DWR scoping hearings. So
>please permit me to enter my comments via the Web.
>
>Please use good economic criteria in calculating future supply and demand.
>The Update should evaluate a broad range of criteria recognizing the
>ranges of needs in both the urban and agricultural sectors. To assure

>good criteria for evaluating future demands, supplies and shortages,
>please strongly consider having them reviewed by an outside panel of
>experts.
>
>Develop a baseline for projections that is fully credible. I understand
>the criteria for doing so are well known.
>
>A very important criteria should be the elimination of subsidies to any
>users. Users should have to pay for the water they use. That would help
>eliminate marginal users who are virtually wasting water. I would assume
>agricultural users would have to charge more for their product. So be it,
>we either pay more for such products or we pay for the subsidy.
>
>Water budgets should recognize and even encourage willing-seller-buyer
>water transfers sowater can be used ever more wisely.
>
>Thank you for the opportunity to comment.
