California Water Plan Update 2013  
June 29, 2011

Water Quality

Objective:
Highlight regional and statewide water quality challenges and recommend strategies to protect and improve water quality to safeguard public health, the environment, and improve water supply reliability.

Deliverables:
Summarize Regional Water Quality conditions. Possible topics include:
- Surface Water / Groundwater Quality
- Use of Water quality related Resource Management Strategies within each Region (current and future)
- Regional Water Quality Priorities and Recommendations
- Water Quality success stories and/or key projects
- Inventory of water quality facilities (e.g. drinking water systems, wastewater/recycled water treatment plants, etc.)
- Other Regional Topics as determined by stakeholder input

Update the following Statewide Water Quality Topics:
- Water Quality Objective in the Strategic Plan
- Water Quality in the California Water Today Chapter
- Statewide Resource Management Strategies (Water Quality related):
  - Recycled Municipal Water
  - Drinking Water Treatment and Distribution
  - Groundwater & Aquifer Remediation
  - Matching Water Quality to Use
  - Pollution Prevention
  - Salt and Salinity Management
  - Urban Runoff Management
  - Recharge Areas Protection
- 2005 Californians without Safe Drinking Water
- Summary of Water Quality Monitoring & Assessment Databases
- Other Statewide Topics as determined by stakeholder input
Schedule:

♦ Revise Work Plan per Public AC feedback: Summer 2011.
♦ Form Water Quality Caucus: Summer 2011.
♦ Final Water Plan: Fall 2013.
