Water Plan Update *Future Scenarios*

Relevance to Groundwater Content Enhancements

- Three plausible sets of future conditions that can affect the necessity for (and performance of) management strategies

- Used to assess trade-offs and resiliency of resource management strategy packages to guide groundwater action and policy recommendations
Many groundwater policy and action recommendations will be drawn from menu of Resource Management Strategies.

- Update 2009 strategies included conjunctive use, groundwater storage, recharge area protection, aquifer remediation, etc.

One source of information for estimating groundwater management strategy costs.
Update 2013 will include a new financial planning feature that will be informed by the groundwater content enhancements.
Water Plan Update 2009

A Foundation for
Update 2013 Finance Plan
“California needs a water finance plan with stable, continuous funding from an array of revenue sources… The finance plan should recognize the critical role of public-private partnerships and the principle of beneficiary pays; include alternative revenue sources; and guide investment decisions based on sustainability indicators”.
