Co-Equal Regional Objectives:

1. Protect, conserve, optimize, and augment water supply while maintaining ecosystem health
2. Protect, restore, and enhance water quality
3. Provide stewardship of water dependent natural resources
4. Maintain and enhance water, wastewater, emergency response, and power generation infrastructure efficiency and reliability
5. Address climate variability and reduce greenhouse gas emissions
6. Promote participation of small and disadvantaged communities, including Tribes, in IRWM process to identify and work towards meeting their needs
7. Promote sustainable stormwater and floodplain management that enhances flood protection
8. Promote sound groundwater and surface water monitoring, management, and mitigation in cooperation with all affected parties

CHALLENGES

- Size of region
- Reaching all stakeholders
- Maintaining stakeholder engagement
- Decision-making process
- Limited financial resources and technical, human capacity
- Small (but growing!) voice in Sacramento
OPPORTUNITIES
PLANS FOR FUTURE

• Continue to build upon collaborative, stakeholder-driven process
• Long-term funding strategy
• Working with DACs
• Develop concept of integration
• Assessing regional needs
• Building capacity
• Continue funding high-priority projects
LESSONS LEARNED

• Some entities require more help with grantwriting than others
• Some stakeholders will participate more than others
• Resources that are required by stakeholders within the region are not always project-based
• Even within this large and diverse region, there ARE common water resource issues
• People try to see past their differences to work towards a common good
