- Recaps lessons learned for moving forward
- Expands on the 3 themes for Update 2013
- Discusses the State’s role in IWM:
  - Basic obligations
  - Commitments and Responsibilities
  - Advancing innovation and infrastructure
California Water Today

- Extreme variation and diversity in the State
- Land use and development patterns
- Water conditions
- Critical challenges
- Responses and opportunities
- Litigation and legislation
Volume 1, Chapter 4

Water Governance and Strengthening Government Alignment

- Water governance and management in CA
- Related plans from other State agencies
  - reflected in Implementation Plan (Ch. 8)
  - reflected in Resource Mgmt. Strategies (Vol. 3)
- Implications and considerations
Managing an Uncertain Future

- Accounting for risk and uncertainty
- Looking at various possible futures
  - describing the use of scenarios
- Managing for sustainability
  - pilot efforts with sustainability indicators
Integrated Data and Analysis

- Role of data and analysis in supporting IWM
  - Integrated Flood Management
  - Ecosystem Restoration & Ecosystem Services
  - Adapting to Climate Change
- Discussion of technical enhancements
  - linking collaborative process and data enhancement
  - developing better analytical tools
  - improving and better sharing information
Finance Planning Framework

- Scope and process for effort
- Key facts and findings
- Framework components:
  - IWM scope, outcomes, activities and costs
  - Existing funding, expenditures and reliability
  - State government’s role in IWM & partnerships
  - Funding who and how
  - Tradeoff analyses
- Next steps
Roadmap for Action

- Vision, mission, goals and guiding principles
- Objectives and related actions
- (See Objectives handout)
New Features

- Information on groundwater
  - Groundwater conditions
  - Groundwater management
- Finance planning framework
- Discussion on near-coastal resources
- New Resource Management Strategies
  - Sediment Management
  - Outreach and Education
  - Culture and Water
• Greater emphasis on regional planning
• Expanded discussion on flood management
• Expanded discussion on water quality (surface and groundwater quality)
• Greater detail on climate change, and adaptation and mitigation
• Pilot projects for improved data, modeling and metrics
