Proposal for Re-framing the California Water Plan Update 2009
Integrated Flood Management Strategy Narratives
June 23, 2008

**Preamble** – Common introduction to all three strategies should emphasize FLOODSAFE integration, integrated flood management, local self sufficiency; in Sidebar summarize FLOODSAFE Strategic Plan Vision, Goals and Objectives, Guiding Principles

1. **Planning, Standards, Design, Regulations** *(formerly “Flood Susceptibility Modification”)*
   - Floodplain Regulation
     - Land Use Policies
   - Facility Design/Location
   - Multi-hazard Planning
   - Housing/Building Codes

2. **Flood Preparedness** *(formerly “Flood Impact Modification”)*
   - Information
   - Education
   - Disaster Preparedness
   - Emergency Response
   - Post-Flood Recovery
   - Flood Insurance
   - Flood Forecasting/Warning
   - Floodproofing

3. **Flood Risk Management** *(formerly “Floodflow Modification” and “Floodplain Restoration”)*
   - Floodplain Restoration and Management
   - Dams and Reservoirs
   - Storage
   - Levees and Floodwalls
   - Channels
   - Diversions and Bypasses
     - Construction & Maintenance

   **Structural and Non-Structural**: Attention is needed to make Flood Risk Management text cover both structural and nonstructural solutions. As written, “Floodflow Modification” strategy narrative currently emphasizes structural. More content is needed on non-structural.

**Words for Glossary**:
Terms that will require special attention and definition for Glossary:
- “Diversions”
- “Channels”
- “Land Use Policies”
